**LSZS AD 2.20 LOCAL TRAFFIC REGULATIONS****1. Local flying restrictions and remarks**

Aerodrome in mountainous area: familiarisation mandatory. Pilots must be qualified to operate at LSZS and fulfill the requirements mentioned in "Betriebsreglement" Annex 5 (See <http://www.engadin-airport.ch/Betriebsreglement.70.0.html>)

AD CLSD for arriving fix wing ACFT with APCH Category B and higher if VIS BLW 5 KM or ceiling BLW 2200 ft AGL.

**15 OCT - 15 APR** It is essential to enquire about RWY conditions (SNOWTAM, ATIS or TEL).

Limited aprons

**08 DEC - 14 APR**

Limited aprons during winter period for general aviation ACFT up to 4 tonnes MTOM:

Apron is mostly reserved for ACFT of commercial air TFC, as well as for general aviation ACFT over 4 tonnes MTOM.

ACFT up to 4 tonnes MTOM will be placed on the limited AVBL frozen SN PRKG. Ground time more than a quick turnaround cannot be guaranteed. For longer ground time, it is urgently recommended to enquire about expected PRKG possibilities with Samedan AP Authority one day before planned FLT.

Corresponding enquiries have to contain:

- Applicant
- Date of ARR and DEP
- Call sign
- ACFT type
- ETA LSZS UTC
- EOBT LSZS UTC

and shall be addressed to:

Email: [handling@engadin-airport.ch](mailto:handling@engadin-airport.ch)

Phone: +41 (0) 81 851 08 51

Modifications and cancellations of already coordinated FLT shall be immediately notified.

CTN GLD ACT: **MAY - OCT**

CTN: Cars moving W of RWY 03/21.

Circuit and local flights of less than 20 MIN duration, ground running of engines, helicopter test and training flights daily between **1100 - 1300 (1000 - 1200)** and on SUN/HOL are prohibited.

**2. Procedure for taxiing ACFT**

Taxi with minimum possible engine power due to jet blast on tarmac.

## LSZS AD 2.21 NOISE ABATEMENT PROCEDURES

### 1. Jet and turbo-prop ACFT

For deceleration, it is recommended that the entire RWY LEN AVBL is used. Reverse thrust shall be used for safety or operational reasons only.

APU shall be started 30 MIN before EOBT, at the earliest, and shall be shut off 15 MIN after the RCH parking PSN at the latest.

### 2. Propeller aeroplanes

Aircraft of the noise category A (FAL 3-1 APP B1-B7) are generally not allowed. Exceptions are subject to authorization.

## LSZS AD 2.22 FLIGHT PROCEDURES

### 1. Special regulations for IFR approach and departure

#### 1.1 IFR Procedures General

The use of IFR APCH or DEP procedures in LSZS is limited to pilots, operators and ACFT fulfilling the AP Qualifications in accordance with § 1.4. and the specific requirements below.

Availability of the IFR Procedures depending on the military activity in the temporary reserved areas (TRA) REF: ENR 5.2

The non-availability of the ATS Route can be checked under “**European AUP/UUP**” on

URL: <https://www.public.nm.eurocontrol.int/PUBPORTAL/>

The availability of the IFR Procedures can also be suspended by good weather conditions due to high traffic density.

Check NOTAM about IFR-status and for further information the pilot briefing on

URL: <http://www.engadin-airport.ch/Briefings.417.0.html>

The published altitudes of the IFR procedures are not corrected for any pressure and temperature errors.

The flight crew is responsible for these corrections. The altimeter error may be significant in extremely cold temperatures and at high altitudes.

The following table indicates the minimum correction value to be applied to the flight altitude in relation to the aerodrome temperature.

Aerodrome Temperature LSZS							
Altitude ft	0° C	-5° C	-10° C	-15° C	-20° C	-25° C	-30° C
16000	+153 ft	+348 ft	+543 ft	+738 ft	+933 ft	+1128 ft	+1323 ft
14000	+122 ft	+279 ft	+435 ft	+591 ft	+748 ft	+904 ft	+1060 ft
13000	+107 ft	+245 ft	+382 ft	+519 ft	+656 ft	+793 ft	+931 ft
12700	+103 ft	+234 ft	+366 ft	+497 ft	+629 ft	+760 ft	+892 ft
12400	+99 ft	+224 ft	+350 ft	+476 ft	+602 ft	+727 ft	+853 ft
11800	+90 ft	+204 ft	+319 ft	+433 ft	+547 ft	+662 ft	+776 ft
11400	+84 ft	+191 ft	+298 ft	+404 ft	+511 ft	+618 ft	+725 ft
10600	+72 ft	+164 ft	+256 ft	+348 ft	+440 ft	+531 ft	+623 ft
9500	+56 ft	+127 ft	+199 ft	+270 ft	+342 ft	+413 ft	+484 ft
8680	+44 ft	+100 ft	+157 ft	+213 ft	+269 ft	+325 ft	+381 ft

The IFR procedures are partly within airspace class E and G. Watch out for VFR traffic.

**1.2 IFR Departures**

Any departing ACFT must comply with the relevant procedures published on the SID charts. Due to high terrain, any non-adherence to the published PDG will result in an infringement of the minimum obstacle clearance. Contingency procedures (e.g. for OEI operations) must be provided by the operator and must be available to the pilot.

	Lateral	Vertical	Contact	Remark
PELAD 1V Set your VISUAL climb rate as required to avoid obstacles, but not below 10% ~ 610 ft/NM. At 10600 ft continue climb to 11500ft with MNM PDG of 10%.	Proceed via ZS510, ZS511 to PELAD. Enter the PELAD holding pattern. MAX IAS 210 kt to PELAD.	Climb to 16000ft. Cross PELAD at 16000ft or above.	When instructed contact ALPS RADAR 119.225	Maintain visual ground contact to 10600ft.

Close-in obstacles right of track up to 5630 ft shortly after end of RWY 21.

(see chart LSZS AD 2.24.7 - 7)

### 1.3 IFR Approach Procedures

#### VISUAL APCH with RNP guidance RWY 03:

The final approach track is 9.1 degrees offset to the left of the RWY CL, and must be flown in visual conditions due to high terrain in the region of ZS702 (FAF).

#### RNP RWY 21:

Due to close proximity of high terrain in the final and missed approach phase, a strict adherence to the published procedures is required.

The final approach is based on a continuous descent (CDFS principle). When reaching the OCA(H) and no visual contact to the landing RWY is established and can be maintained, start the missed approach climb without delay, proceed to the MAPt and follow the missed approach procedure. Obstacle clearance is calculated with RNP 0.3 until MAPt.

**Level flight to MAPt at OCA(H) prohibited.**

**VISUAL APCH with RNP guidance RWY 03 and RNP RWY 21:**

The flight crew is required to perform a position report at the FAF.

No NOTAM RAIM service will be provided. It is the operator's responsibility to check RAIM availability. Due to the high terrain, a mask angle of 10 DEG should be chosen.

EUROCONTROL provides the AUGUR tool for checking RAIM. It is AVBL from the following link: <https://augur.eurocontrol.int>

#### Communication Failure Procedure

In case of COM failure prior to IAF without approach clearance received:

- Set transponder on 7600.
- Maintain last assigned and acknowledged flight level.
- Enter PELAD/RONAG holding.
- Hold for 20 minutes, then start the approach.

In case of COM failure after having passed the IAF:

- Set transponder on 7600.
- Continue approach
- In case of missed approach perform maximum two holding patterns. If radio contact is not re-established, proceed to alternate aerodrome.

(see chart LSZS AD 2.24.7.10 - 1)

CTN: Step down fix at 9.9 NM to ZS712 not to be coded as WPT.

#### 1.4 Aircraft, Airport and Pilot Qualification

To operate at Samedan under IFR, the following airport requirements must be fulfilled:

- a. For piston engine aircraft and multiple IFR APCH (training) PPR required. [ppr.smv@engadin-airport.ch](mailto:ppr.smv@engadin-airport.ch)
- b. Operator's contingency procedures (if required by the type of FLT operation) must be calculated and available.
- c. The pilot in command must hold a valid pilot qualification for the applicable type of operation and flight procedures.
- d. LSZS briefing not older than 24 months.

#### 1.5 Minima for IFR Departures (TKOF Minima)

RWY	SID	VIS (m) / Ceiling (ft AGL)	RMK
03	RONAG 1E	2000 / ---	Ceiling means BKN or OVC. VMC must be maintained up to the ALT stated in the table.
	RONAG 1V	5000 / 4400	
21	PELAD 1W	2000 / ---	
	PELAD 1V	5000 / 5100	

**LSZS AD 2.23 ADDITIONAL INFORMATION**

High Visibility Jackets and Crew ID badge:

All pilots walking on the AP movement area must wear a high-visibility jacket which complies with the EN 471 standard class 2 or 3.

Persons not wearing a high-visibility jacket have to use the AP shuttle or ask the ground staff or ground handling agents for assistance.

All crew members must ensure their ID badge is clearly visible, above the waist and shall produce the Crew ID badge upon request of the control agents of the AP.
