

This is a detailed aeronautical chart of the Bern-Belp region in Switzerland. The chart is centered on the Bern-Belp airport (LSZB 1675) and shows various flight paths, altitudes, and surrounding geographical features. Key elements include:

- Geographical Features:** The chart shows the Bernese Alps, including peaks like TMA BERN and TMA BERN. The city of Bern is visible, along with the Aargau and Thurgau cantons.
- Flight Paths and Altitudes:** Numerous flight paths are depicted with altitudes ranging from 4000 to 12000 feet. Key altitudes shown include 4000, 4500, 5000, 5500, 6000, 6500, 7000, 7500, 8000, 9000, 10000, and 12000 feet.
- Airports and Navigation Aids:** The primary airport is Bern-Belp (LSZB 1675). Other airports shown include Grenchen (LSZG 1411) and Monin. Navigation aids include the HOC (Horizontal Offset Course) and the ROTOS (Rotational Offset Course).
- Communication and Information:** The chart includes a scale bar (0 to 20 NM) and a compass rose indicating magnetic bearings. The text "VAR 2° E 2019.5" is present, indicating the magnetic variation.
- Other Labels:** The chart includes labels for "GERMANY", "FRANCE", "TMA BERN", "TMA BERN", "BIRKI", "AMRID", "TELNO", "FRIBU", "MEBOX", "RAMOK", "WIL", "HOC", "ROTOS", "GRENGHEN", "FL120", "MONIN", and "BERN-BELP LSZB 1675".

The minimum vectoring altitude chart shows the lowest altitude for the approach / departure sectors of LSZB which may be assigned to an IFR flight under radar vectoring.

The chart may only be used for cross-checking of altitudes assigned while under radar vectoring.

Altitudes: LSZB QNH.

Transition ALT: 6000

Minimum altitudes over Swiss territory are calculated according ICAO norms (PANS-ATM Doc 4444 & PANS-OPS Doc 8168).

Minimum altitudes are protected for low temperatures to minus 4 degrees celsius (LSZB temperature).

Sectors indicated all 30°, distances indicated all 5 NM, based on ARP LSZB.
