

This is a detailed aeronautical chart of the Bern-Belp area in Switzerland. The chart is centered on the Bern-Belp airport (LSZB 1675) and shows various flight paths, altitudes, and surrounding geographical features. Key elements include:

- Geographical Features:** The chart shows the Jura mountains to the west and the Bernese Alps to the east. Major cities like Bern, Fribourg, and Solothurn are indicated. The border between France and Germany is shown to the west.
- Flight Paths and Altitudes:** Numerous flight paths are depicted with their respective altitudes in feet (e.g., 4000, 5000, 6000, 7000, 8000, 9000, 10000, 12000). The chart also shows the Bern-Belp airport (LSZB 1675) and the Grenschen airport (LSZG 1411).
- Navigation Aids:** The chart includes a compass rose indicating magnetic variation (VAR 2° E 2019.5) and a scale bar showing distances in nautical miles (0 to 20 NM) and kilometers (0 to 30 KM).
- Other Markings:** The chart includes various symbols for airports, navigation aids, and other points of interest. The text "GERMANY", "FRANCE", and "BERN-BELP" are visible on the chart.

The minimum vectoring altitude chart shows the lowest altitude for the approach / departure sectors of LSZB which may be assigned to an IFR flight under radar vectoring.

The chart may only be used for cross-checking of altitudes assigned while under radar vectoring.

Altitudes: LSZB QNH.

Transition ALT: 6000

Minimum altitudes over Swiss territory are calculated according ICAO norms (PANS-ATM Doc 4444 & PANS-OPS Doc 8168).

Minimum altitudes are protected for low temperatures to minus 4 degrees celsius (LSZB temperature).

Sectors indicated all 30°, distances indicated all 5 NM, based on ARP LSZB.
