1. LSZB - BERN-BELP AIRPORT - Aerodrome charges**TARIFF REGULATIONS AT BERN-BELP AIRPORT**
(Of 01 JAN 2026)**1.1 General provisions****1.1.1 Legal basis**

The legal basis of the tariff regulations are Art. 39 of the Swiss Aviation Act SR 748.0 and the Ordinance on Airport Charges (SR 748.131.3).

1.1.2 Jurisdiction

These tariff regulations are applicable to the use of Bern-Belp AP.

1.1.3 Airport charges

The AP charges applied are the following:

- LDG charges (mass-related)
- Noise charges
- EM-related LDG charges
- Passenger charges (transfer passengers incl.)
- Parking charges
- Freight charges
- Fuel charges
- Rescue and fire fighting charge
- Winter operations charge
- Handling charges
- Charges for particular services

According to article 39 of the Air Navigation Law (SR 748.0 LFG) of 18 JUN 1993, the AP charges are subject to the supervision of FOCA. They are published in the AIP Switzerland (ground service charge excluded). All published charge rates are to be considered without VAT.

1.1.4 Indemnity for special services

For special services, the AP operator may make additional charges, independent of the AP charges.

1.1.5 Other charges

With the AP charges, an Approach charge (AFS) is levied.

1.1.6 Charges debtor

AP charges have to be paid by the ACFT operator. If the ACFT operator is not known, the ACFT owner is considered as ACFT operator, as long as the latter is not able to prove that this status falls to another person. Debtors of the fuel charges are the fuel companies authorised at the AP.

1.1.7 Charge maturity

The charges are to be paid before TKOF, at the latest. The AP operator may claim the payment at any time. If the AP is used regularly, the AP operator may open a current account. Special conditions are reserved.

1.1.8 Currency

The charges are due in Swiss Francs (CHF).

1.1.9 Collection

The AP operator may delegate the collection of charges to an authorised organization.

1.1.10 Flat rates

For special users groups and/or categories of use, the AP may, in agreement with the users concerned, levy charges in the form of flat rates (e.g. PERM rental contract for parking places through an agreement with the Bernese Gliding Group).

1.2 Landing charges (mass related)

1.2.1 Charge duty

For an APCH with subsequent LDG, a charge is levied depending on the ACFT mass.
For each "Touch-and-go" or "Go-around", the same charge is applicable.

1.2.1.1 Charge determination

The mass-related charge depends on the MTOM of the ACFT, as stated in the Airworthiness Certificate, in the Aircraft Flight Manual or any other equivalent official document.

***Definition of VFR training FLTs**
- Training FLTs must be attended or supervised by a FLT instructor or inspector;
- Training FLTs are neither to be used for commercial purposes nor for the carriage of passengers or goods.

1.2.1.3 Helicopters

For HEL, the same rates are applicable.

1.2.1.4 Special cases

For the FLTs mentioned hereafter, the AP management may apply a reduced charge:

- technical check FLTs;
- FLTs of resident pilots who follow the formation courses and apply the noise-relevant instructions given by Bern Airport AG;
- training and check FLTs under the supervision of a FLT instructor or of an examination expert who has followed the formation courses of Bern Airport AG;
- activities for the improvement of the safety of the air traffic.

1.2.2 Noise charges

1.2.2.1 Charge duty

For an APCH and subsequent LDG, a charge is levied depending on the noise classification of each ACFT. For each "Touch-and-go" and "Go-around", the same charge is levied.

1.2.2.2 New or modified aircraft

If an operator proposes a more advantageous classification for his ACFT, he has to provide evidence by means of appropriate documentation within 60 days after the application. On condition of timely submitted evidence, the noise charges paid during this period will be reimbursed.

1.2.2.3 Jet aircraft

1.2.2.3.1 Noise class determination

Jet ACFT are classified according to the TKOF noise, as measured by the ACFT noise-measuring equipment at Zurich AP. For the classification, the difference between the energetic mean value of the noise level of an ACFT type and the energetic mean value of the noise level measured for all ACFT types is used.

1.2.2.3.2 Noise classification assignment

The assignment of each ACFT to the existing noise classes is given in [GEN 4.1 - Appendix A](#) (Noise classification for jet aircraft).

1.2.2.3.3 Charge rates

The noise-related charge is as follows:

Noise class	Charge in CHF (excl. VAT)
I	1000.--
II	600.--
III	400.--
IV	200.--
V	no charge

1.2.2.4 Propeller-driven airplanes up to 8618 kg MTOM

1.2.2.4.1 Noise classification assignment

The noise charge depends on the airplane assignment to one of the classes A-D. For the assignment of Swiss ACFT, the classification list of the Swiss ACFT register is applicable. For foreign ACFT, the classification list of ACFT types [GEN 4.1 - Appendix B](#) (Noise classification for propeller-driven aircraft without special sound-proofing) applies.

1.2.2.4.2 Charge rates

The noise charge per tonne MTOM, or part thereof, is as follows:

Noise class	Charge in CHF (excl. VAT)
A	10.--
B	6.--
C	3.--
D	no charge

1.2.2.5 Helicopters and propeller-driven airplanes of more than 8618 kg MTOM

For HEL, as well as propeller-driven airplanes of more than 8618 kg MTOM, no noise charge will be levied until a relevant noise classification model is submitted.

1.2.3 Weekend surcharge (valid for all classified aircraft)

For FLTs on SUN and on public HOL, double the noise-related charge is due.

1.2.4 Approaches without subsequent landing

The noise charges are also due when APCHs, without subsequent LDG, are executed for training purposes.

1.2.5 Emission-related landing charges

(WEF 01 APR 2010)

1.2.5.1 Principle

An EM-related LDG surcharge is applied to all ACFT equipped with a combustion engine and that are subject to a WT-based LDG charge. The EM charge is based on the absolute EM characteristic of the engine, as described in the FOCA Directive "Aircraft Engine Emission Charges in Switzerland" (Reference 33-05-27).

1.2.5.2 Aircraft with turbofan, turbojet or turboprop engines with emission data available to FOCA

ACFT equipped with turbofan, turbojet or turboprop engines that are:

- regulated under ICAO Annex 16, Volume II, or
 - not regulated, but have detailed EM data for the LDG-TKOF (LTO) cycle AVBL to FOCA,
- are subject to the EM calculation as specified in ECAC Recommendation 27/4. Specifically, the following EM calculation formula applies:

$$\text{EmissionValueAircraft} = a * \# \text{Engines} * \sum_{LTO - \text{modes}} (60 * \text{time} * \text{fuelflow} * \text{NOx}_{\text{Emissionfactor}} \div 1000)$$

where:

- a = 1 if the characteristic certification LTO Hydrocarbon emissions per rated thrust (HC Dp/Foo) is less than or equal to the current ICAO standard of 19.6 g/kN rated thrust or for unregulated engines.
- a > 1 if the characteristic certification LTO Hydrocarbon emissions per rated thrust (HC Dp/Foo) is greater than the current ICAO standard.
 $a = \text{HC Dp/Foo} / 19.6$, with a maximum value for 'a' of 4.0

LTO-Modes: ICAO Certification LTO Modes:

Mode	Time (in minutes)
Take-off	0.7
Climbout	2.2
Approach	4.0
Taxi/Idle	26.0

Engines: number of engines fitted to the aircraft

Time: time in mode (see above) (in minutes)

Fuelflow: fuel flow per mode (in kg/sec)

NO_xEmissionfactor Measured NO_x-Emission factor per mode (in g/kg fuel)

EM factors and fuel flow for the four modes and the hydrocarbon certification value are taken from the ICAO engine database (regulated engines). EM data for unregulated engines are taken from the FOCA and FOI EM database. The FOCA website provides additional information:

www.bazl.admin.ch -> For Specialists -> Environment

1.2.5.3 Aircraft with piston engines, helicopter and aircraft with engines without emission data available to FOCA

ACFT equipped with

- piston engines
- rotary wing engines
- any other engine without EM data AVBL to FOCA

are also subject to an EM charge. Specifically, they are assigned an EM value derived the type, PER and number of engines fitted to the ACFT, as detailed in Table 1.

Table 1: FOCA Aircraft Emission Value Matrix

# Eng	Piston: Turbodiesel Microlight Ecolight	Piston: Conventional	Piston: Conventional	Piston: Conventional	Helicopter	Helicopter	Business- Jets	Business- Jets	Turbo- props

For each passenger departing aboard an ACFT, a charge is due, with the exception of the exemptions listed in [1.3.3](#).

1.3.2 Charge rates

The charge for each departing passenger amounts to:

- CHF 10.-- for passengers of international private and commercial traffic;
- CHF 10.-- for passengers of national commercial traffic;

- infants up to the age of two;
- passengers of sight-seeing FLTs.

1.4 Parking charges

1.4.1 Charge duty

For the parking of an ACFT in the OPN, a charge is levied, after a free parking period has elapsed.

1.4.2 Criteria for charge determination

The criteria for determining the charge are both the parking time and the parking place. Parts of a day and of an HR will be charged as a whole day or a whole HR. 24 HR is counted from the beginning of the charge duty and considered as one day. A parking place is defined by the respective indication on the area.

1.4.3 Assignment of the parking places

The AP operator determines the area on which the ACFT may be parked. The AP operator may determine a MAX period for the parking.

3.1.4 Indemnity for special services

For special services, the AP operator may make additional charges, independent of the AP charges.

3.1.5 Charges debtor

AP charges have to be paid by the ACFT operator. If the ACFT operator is unknown, the ACFT owner is considered as the aircraft operator as long as the latter is not able to prove that this status falls to another person.

3.1.6 Charge maturity

The charges must be paid before TKOF, at the latest. The AP operator may claim the payment at any time. If the AP is used regularly, the AP operator may open a current account. Special conditions are reserved.

3.1.7 Currency

The charges must be paid in Swiss Francs (CHF).

3.1.8 Collection

The AP operator may delegate the collection of the charges to an authorised dispatch office.

3.2 Landing charges (mass related)

3.2.1 Charge duty

For the APCH and the subsequent LDG of an ACFT, a LDG charge is levied that depends on the MTOM of the ACFT.

3.2.2 Charge determination

The LDG charge depends on the MTOM authorised for the ACFT, as stated in the Airworthiness Certificate or Aircraft Flight Manual or in any other equivalent official document. Any part of a tonne will be considered as a whole unit.

HEL are charged the same rates.

- The LDG charge for commercial air transport, computed in accordance with article 3, is reduced by 50% when the preceding TKOF takes place at a Swiss AD (incl. Bâle-Mulhouse), and the same ACFT CONTs within two HR on the same day to a DEST outside Switzerland (excl. Bâle-Mulhouse), and the same FLT number is used on ARR as on DEP.

Art. 3a Noise charges for jet-engine aircraft

At Genève AP, a noise charge is added to the LDG charge. The noise charge is based on a classification of jet-engine ACFT established on the basis of the noise level (mean energetic value) of each ACFT type measured in the VCY of Swiss APs. Each ACFT is then classified in a Noise Class (REF: [GEN 4.1 - Appendix A¹](#))

The noise charge rate is as follows (CHF, excl. VAT):

Noise class	Noise charge in CHF (excl. VAT)
I	4400.--
II	880.--
III	220.--
IV	40.--
V	10.--

For TKOF between 2100 (2000) and 0459 (0359), an additional noise charge is applied to jet-engine ACFT. The additional noise charge is based on noise class and TKOF time.

The additional noise charge rate is as follows (CHF, excl. VAT):

Noise class	ATD				
	2100-2129 (2000-2029)	2130-2159 (2030-2059)	2200-2229 (2100-2129)	2230-2259 (2130-2159)	2300-0459 (2200-0359)
	Noise charge in CHF (excl. VAT)				
I	1500.--	2000.--	3000.--	6000.--	18000.--
II	500.--	1000.--	1500.--	3000.--	9000.--
III	200.--	400.--	800.--	1500.--	4500.--
IV	100.--	200.--	400.--	800.--	2500.--
V	50.--	100.--	200.--	400.--	1500.--

New ACFT or ACFT subsequently re-engined, as well as ACFT types not included in [GEN 4.1 - Appendix A¹](#), are placed in class V until confirmed measurable data are AVBL.

Hushkitted ACFT are placed one class beyond the original type until confirmed measurable data are AVBL. The operators are requested to make AVBL to the AP operator all documents certifying the modifications that have been carried out. There will be no retroactive reimbursement.

Objections to the classification of the ACFT have to be notified within 60 days of receipt of the invoice. Late requests are time-barred.

The noise charge is not applicable to ACFT exempt from LDG charges in accordance with article 8 below.

Art. 3b Noise charges for propeller-driven aircraft

A noise charge is applied to propeller-driven ACFT with MTOM of less than or equal to 8618 kg (MTOW ≤ 8618 kg). The noise charge is based on a classification of propeller-driven ACFT established by FOCA on the basis of the difference between the noise level limits according to ICAO Annex 16 Chapter 10 and the noise level measured and corrected for the ACFT PER factor or for the corresponding ACFT type ([GEN 4.1 - Appendix B²](#)).

- Appendix A - Noise classification for jet aircraft ([www.bazl.admin.ch > For specialists > Airworthiness and Technology > Design and Production > Environment > French > Classes de tarifs en fonction du bruit > Classification des avions à réaction](#))
- Appendix B - Noise classification for propeller-driven aircraft without special sound-proofing ([www.bazl.admin.ch > For specialists > Airworthiness and Technology > Design and Production > Environment > French > Classes de tarifs en fonction du bruit > Classement pour les types de référence](#))

The classification of ACFT registered abroad is established in conformity with the corresponding ACFT type. The operator is allowed to propose a more advantageous classification for his ACFT within 60 days of the implementation of the charge. As long as the evidence necessary to support a new classification are presented within the required time, the excess charges will be reimbursed.

Noise class	Difference
A	noise level HYR than the limit value;
B	0 to 1.9 dB less than the limit value;
C	2 to 4.9 dB less than the limit value;
D	5 dB and HYR less than the limit value.

Noise class	Noise charge
A	15.40 per tonne;
B	8.80 per tonne;
C	4.40 per tonne;
D	1.50 per tonne;
Helicopter	2.50 per tonne

The expenditures on the fund financing the soundproofing obligations are, at present, lower than the revenues and its balance already shows a substantial surplus.

Therefore, as an exceptional measure and given the unprecedented current circumstances, the invoicing of the fee shown in the two (2) above tables is suspended between January 1st, 2021 and December 31st, 2023. An eventual extension of the invoicing suspension is subject to an assessment of the environmental fund balance by Genève Aéroport during the course of 2023.

For TKOFs between 2100 (2000) and 0459 (0359), an additional noise charge is applied for propeller-driven ACFT with a MTOM HYR than 8618 kg (MTOW > 8618 kg). The additional noise charge rate is equal to the additional noise charge applicable to jet-engine ACFT classified in noise class V (see article 3a above).

The noise charge rate is as follows (CHF, excl. VAT):

Noise class	ATD				
	2100-2129 (2000-2029)	2130-2159 (2030-2059)	2200-2229 (2100-2129)	2230-2259 (2130-2159)	2300-0459 (2200-0359)
V	50.--	100.--	200.--	400.--	1500.--

The noise charge is not applicable to ACFT exempt from LDG charges in accordance with article 8 below.

Art. 3c Indemnification charge for business and general aviation aircraft

A fee equal to 25% of the applicable landing charge is levied per landing to cover the indemnity amounts to be paid to neighboring property owners for the loss of property value caused by the noise levels of aircraft operating to/from Geneva International AP.

Art. 4 Emission-related landing charges (WEF 01 MAY 2010)

Art. 4a Principle

An EM-related LDG surcharge is applied to all ACFT equipped with a combustion engine and that are subject to a WT-based LDG charge. The EM charge is based on the absolute EM characteristic of the engine, as described in the FOCA Directive "Aircraft Engine Emission Charges in Switzerland" (Reference 33-05-27).

Art. 4b Aircraft with turbofan, turbojet or turboprop engines with emission data available to FOCA

ACFT equipped with turbofan, turbojet or turboprop engines that are:

- regulated under ICAO Annex 16, Volume II, or
- not regulated, but have detailed EM data for the LDG-TKOF (LTO) cycle AVBL to FOCA

are subject to the EM calculation, as specified in ECAC Recommendation 27/4. Specifically, the following EM calculation formula applies:

$$\text{EmissionValueAircraft} = a * \# \text{Engines} * \sum_{LTO - modes} (60 * \text{time} * \text{fuelflow} * \text{NOx}_{\text{Emissionfactor}} \div 1000)$$

where:

- a = 1 if the characteristic certification LTO Hydrocarbon emissions per rated thrust (HC Dp/Foo) is less than or equal to the current ICAO standard of 19.6 g/kN rated thrust or for unregulated engines.
- a > 1 if the characteristic certification LTO Hydrocarbon emissions per rated thrust (HC Dp/Foo) is greater than the current ICAO standard.
a = HC Dp/Foo /19.6, with a maximum value for 'a' of 4.0

LTO-Modes: ICAO Certification LTO Modes:

Mode	Time (in minutes)
Take-off	0.7
Climbout	2.2
Approach	4.0
Taxi/Idle	26.0

- # Engines: number of engines fitted to the aircraft
- Time: time in mode (see above) (in minutes)
- Fuelflow: fuel flow per mode (in kg/sec)
- NO_xEmissionfactor Measured NO_x-Emission factor per mode (in g/kg fuel)

EM factors and fuel flow for the four modes and the hydrocarbon certification value are taken from the ICAO engine database (regulated engines). EM data for unregulated engines are taken from the FOCA and FOI EM database. The FOCA website provides additional information: www.bazl.admin.ch -> For Specialists -> Environment

Art. 4c Aircraft with piston engines, helicopter and aircraft with engines without emission data available to FOCA

- ACFT equipped with
- piston engines
 - rotary wing engines
 - any other engine without EM data AVBL to FOCA

are also subject to an EM charge. Specifically, they are assigned an EM value derived from the type, PER and number of engines fitted to the ACFT, as detailed in Table 1.

Table 1: FOCA Aircraft Emission Value Matrix

Art. 4d Emission tariff

The applicable tariff is CHF 1.40 per Emission Value_{Aircraft}

Art. 5 A reduction of 66^{2/3}% on the rates of article 3 is granted for ACFT with a MTOM over 8618 kg when used for:

- instruction-, training- or check FLT's of pilots accompanied by or under the surveillance of a FLT instructor or inspector of an airline;
- technical check FLT's and transfer FLT's without payload.

Art. 6 Local air crew training schools and other operators of ACFT based permanently at the AP may be granted more favorable rates than those of article 3 when the MTOM of the ACFT does not exceed 8618 kg.

Art. 7 The LDG charge is also due when for instruction-, training- or check purposes of pilots, the APCH is not followed by a LDG.

Art.8 The following are exempt from the LDG charge when using an AP:

- A. FLT's made exclusively to transport the following persons on official mission, provided that the corresponding status is indicated in the flight plan:
1. the ruling monarchs and the members of their close family,
 2. the Heads of State, heads of government and government ministers;
- B. the SAR FLT's referred to in ORSA (RS 748.126.1).

Art. 9 The AP operator is authorised to claim special compensation to cover the extra costs when an ACFT takes off or lands outside the OPN HR laid down in the operational licence of the AP.

CHF (excl. VAT)

Charge per departing passenger

As from January 1st 2025 0.60

As from January 1st 2026 0.65

The indemnification charge shall automatically end once the indemnification fund exceeds 24MCHF (twenty-four million Swiss Francs) of contributions from the scheduled and charter air traffic sector.

Following an annual assessment by the AP operator, in the event the indemnification fund amount exceeds 15MCHF (fifteen million Swiss francs), the levy of the indemnification charge shall be suspended for the following year (from January 1st to December 31st).

Then, following an annual assessment by the AP operator, if the indemnification fund amount falls below 15MCHF (fifteen million Swiss francs), the levy of the indemnification charge shall resume for the following year (from January 1st until December 31st).

The AP operator shall publish the result of the annual assessment of the indemnification fund by 1st October of each year.

Art. 11 Parking charges

Art. 11a General aviation

Parking positions are always assigned by AP Authority.

For the parking of an ACFT, a charge is levied on the basis of the MTOM, after a free parking period has elapsed.

Parts of a tonne, an HR or a day are computed as a full tonne, a full HR or a full day.

The AP operator decides on the parking space of the ACFT.

- a. The free parking period is two HR.
- b. After the free parking period, the parking charge is:
 - CHF 10.-- per day for ACFT up to a MTOM of 2000 kg;
 - CHF 5.-- per day and per tonne for ACFT with a MTOM over 2000 kg, and up to a MTOM of 20000 kg.
 - CHF 7.50 per day and per tonne for ACFT with a MTOM over 20'000 kg, and up to a MTOM of 100000 kg.
 - CHF 10.-- per day and per tonne for ACFT with a MTOM over 100'000 kg.
- c. For ACFT up to a MTOM of 5700 kg permanently based at Genève AP and which have been allocated corresponding hangar space, a monthly flat charge may apply. In any case, granting of such space is subject to availability. For ACFT with a MTOM exceeding 100 tonnes, an additional CHF 8.00 is levied per tonne and per day for non-scheduled commercial air traffic.

Art. 11b Scheduled and charter traffic

For the parking of an ACFT, a charge is levied on the basis of the ICAO category of the ACFT after a free parking period has elapsed. The parking period is considered to be the time between the ATA and the ATD as logged by the AP operator. Night stop refers to an ACFT with an ATA after 2000 (1900) and an ATD before 0700 (0600).

The charge amounts to CHF --.06 (excl. VAT) per kg of import and transfer cargo.

Art. 14 Ground service charges

For the servicing of an ACFT by the AP operator or by an agent authorised by him for this purpose, a ground service charge is levied in accordance with the basic rates or under the terms of a special agreement with the user.

Art. 15 Utilization Charges

Art. 15a De-icing station

A de-icing charge is levied for each ACFT departure and is meant to refinance infrastructure for the storage of de-icing fluids as well as the filling station for de-icing vehicles. The charge is based on the ICAO ACFT category and is applicable each year between 01 OCT and 30 APR.

Aircraft Category	De-icing Charge in CHF
A, B, C	23.50
D, E, F	56.00

Art. 15b Energy supply for aircraft

The energy charges are meant to refinance infrastructures for the supply of electricity and air conditioning to ACFT. Whenever available, the use of the supplied electricity is mandatory while the provision of air conditioning remains optional. The charge is based on the ICAO ACFT category.

The following minimum one hour charges apply:

Aircraft Category	Electricity 400 Hz in CHF	Electricity and preconditioned air (PCA) in CHF
B	20.00	30.00
C	20.00	30.00
D	30.00	40.00
E	40.00	55.00

After the first hour, the use of the infrastructure is charged based on the effective hour fractions:

CAAV	TE in CHF	TC in CHF
C	20.00	10.00
D	30.00	10.00
E	40.00	15.00
T = Tax; E = Electricity; C = Air Conditioning		

Rate of electricity calculation: $20.00/60 (TE) * \text{length in minutes}$ for CAAV = C.
If length < or = to 60 min. = 1 hour minimum = 20.00

Rate of electricity + air cond.: $20.00/60 (TE) * \text{length in minutes} + 10.00/60 (TC) *$
length in minutes for CAAV = C. (rule of the minimum fixed time for every energy category).

Art. 15c User fee for Baggage sorting

The user fee for baggage sorting applies only to scheduled and charter air traffic and is levied per departing passenger.

User fee	As from July 1st, 2024	As from January 1st, 2026	As from January 1st, 2027

A	360.00	180.00
B	450.00	225.00
C	540.00	270.00

Art. 16 Methods of payment

In principle charges due by the ACFT operator shall be paid prior to TKOF.

The Airport Authority may propose payment terms at 30 days, subject to the establishment of corresponding guarantees (bank guarantee, deposit on the customer account or prepayment). In the absence of such guarantees, or in case of outstanding amounts on the customer's account, the payment before departure principle applies.

Geneva Airport is commissioned by Slot Coordination Switzerland to invoice the slot service fee. The fee due by the air carrier amounts to CHF 1.00 per movement.

Art. 18 PPR fee

For general aviation and business aviation (non-scheduled traffic), a fee for the management of the prior permission required (PPR) system infrastructure is levied per aircraft movement.

Charge per aircraft movement in CHF
3.00

Art. 19 Incentive Program

The following incentive program only applies to scheduled and charter air traffic.

Art. 19a Landing incentive

This incentive recognizes the operation of new generation aircraft on the "best in class" principle. Narrow body aircraft categorized in noise class 5 as well as wide-body aircraft categorized in noise class 4 according the Swiss AIP shall be entitled to the following incentive the amount of which is calculated based on a percentage of the applicable landing charges:

Percentage

Incentive on landing

As from January 1 st 2025	20%
As from January 1 st 2027	17%

Art. 19b Passenger incentive

In addition to the incentive on landing, a further incentive is granted for departing passengers transported aboard eligible aircraft categories as set forth under Art.19a.

CHF (excl. VAT)

Incentive per departing passenger

As from January 1 st 2025	0.40
As from January 1 st 2027	0.34

Art. 19c Incremental Bonus

In order to stimulate airlines in replacing aircraft currently operating to and from Geneva International AP with new generation aircraft and consequently significantly contributing to the objectives set forth in the PSIA, the AP operator shall also grant an incremental bonus on the landing charges according to the following formula:

$$x \cdot (p1 - p2) \cdot 1.5$$

Where: x = amount of landing charges applicable to eligible NG aircraft in year n

p1 = percentage of movements operated by eligible NG aircraft in year n

p2* = percentage of movements operated by eligible NG aircraft in year n-1

1.5 = multiplying factor

*Note:

The year of reference for the calculation of the incentives in 2021 (year n) will be the traffic figures of 2019 (year n-1).

As from year 2022, year n-1 will be the previous year.

Any bonus is only applied once per the concerned year.

The incremental bonus shall not be granted in the event the percentage of NG aircraft is lower than that of the previous year.

Following a reduction in the percentage of eligible NG aircraft, the incremental bonus shall only be granted once again if the percentage of eligible NG aircraft has equalled or exceeded the previous highest percentage of eligible NG aircraft achieved by the concerned air carrier over the tariff period.

p2 must be > 0

Only Airport Users operating year to year on full IATA seasons are eligible.

Art. 19d Load Factor

An incentive per departing passenger is set forth as per the table below:

Load Factor Reward		
If the load factor is for a given year is:		Discount on PSC per departing PAX in CHF
Greater or equal to	95%	0.15
Greater or equal to	90%	0.125
Greater or equal to	85%	0.08
Greater or equal to	80%	0.05

Art. 19e Incentive implementation date

The implementation date of the incentives set forth under Article 19 is: January 1st, 2025.

Art. 19f General Remark

Any benefit resulting from the application of the incentive scheme shall be provided to the eligible Airport User in the form of a credit note issued in January following the year under review. Airport Users with airport charges payment delay or default in a given year will not benefit from incentives for that year.

Art. 20 Noise Quota charge

The following only applies to scheduled and charter air traffic.

A Noise Quota charge is levied per delayed scheduled departure between 1900 (1800) and 2059 (1959) taking-off after 2059 (1959) once the concerned carrier has used all of its attributed Noise Quotas.

Noise Quotas are allocated by AP operator to airlines with departures scheduled between 1900 (1800) and 2059 (1959) for delayed TKOF after 2059 (1959). Noise Quotas are allocated to eligible airlines annually and proportionally to their scheduled departures between 1900 (1800) and 2059 (1959).

The number of Noise Quotas available for distribution to eligible airlines each year is determined by AP operator according to the extent of the noise curve to be respected. The weighting of Noise Points by aircraft type is based on ICAO certification values according to ICAO Annex 16 to the Convention on International Civil Aviation.

Eligible airlines are responsible for monitoring the use of the Noise Quotas distributed to them for TKOF delayed beyond 2059 (1959). Consumption of Noise Quotas for each flight depends upon the aircraft type and associated Noise Points.

Once the Noise Quotas allocated to a specific airline have been used up, TKOF of that airline delayed beyond 2059 (1959) are subject to a strong incentive charge (Noise Quota charge), depending upon the ICAO ACFT category and the number of occurrences.

NOISE QUOTA CHARGE per delayed scheduled departure between 1900 (1800) and 2059 (1959) taking-off after 2059 (1959) without quota:

CHF (excl. VAT)

AIRCRAFTS	Narrow Body	Wide-Body
ICAO CODES	A, B, C	D, E, F
First occurrence	5000.00	10000.00
Second occurrence	10000.00	20000.00
From 3 rd occurrence onwards	20000.00	40000.00

The charge for delayed TKOF after 2059 (1959) is not applicable to aircraft exempt from landing charge as defined in the Swiss AIP Gen 4.1.

Proceeds from this charge are allocated to AP operator's environment fund and used to finance measures to protect the environment and neighbouring communities.

Detailed operating rules of the Noise Quotas scheme are set forth in the "Noise Quotas System Operating Rules" and made available to ACFT operators on www.gva.ch.

Noise surcharge on landing charge**Art. 17 Obligation**

For each LDG, there shall be a surcharge calculated on the LDG charge due, payable in accordance with the noise level of the ACFT.

Noise classes**Art. 18 a) Jet-engine aircraft**

Jet-propelled ACFT shall be assigned to one of the noise classes I to V. The class assignment is published in [GEN 4.1 - Appendix A](#)

Art. 19 Noise surcharge rates

The amount of the noise surcharge is:

Noise class	Noise charge CHF (excl. VAT)
I	1000.--
II	600.--
III	400.--
IV	200.--
V	80.--

Art. 20 b) Propeller-driven aircraft not exceeding 8618 kg MTOM

The assignment of propeller-driven ACFT with a MTOM not exceeding 8618 kg into one of the noise classes A to D corresponds to the classification established by FOCA. The decisive factor in this regard is the difference between the mandatory noise level limits in accordance with ICAO Annex 16 and the measured noise level of the ACFT type corrected using the PER correction factor.

Art. 21 Assignments to the noise classes

ACFT registered in Switzerland are assigned to the classes mentioned below in accordance with the Swiss Aircraft Register. ACFT registered abroad are classified in accordance with Appendix B to the tariff regulations for public APs in Switzerland (Noise classification for propeller-driven ACFT without special sound-proofing, ref. [GEN 4.1 - Appendix B](#)).

Art. 22 Noise surcharge rates

The amount of the noise surcharge per tonne or part thereof is:

Noise class	Noise charge CHF (excl. VAT)
A	20.--
B	15.--
C	10.--
D	no surcharge

Art. 23 Surcharge on Saturday, Sundays and local holidays

For LDGs on SAT, SUN and local HOL, the noise surcharge is increased by 50% for:

- all ACFT
- in addition from 0600-0700 (0500-0600) / 1100-1230 (1000-1130) / 1900-2100 (1800-2000)

Between 2101-0559 (2001-0459), the noise charge is increased by 100% for all ACFT.

Art. 24 New and modified aircraft

In the event that a party liable to pay the charges submits a claims for a more advantageous classification, it shall provide evidence to Lugano AP Authority by submitting appropriate documentation within 60 days of the date on which the claim is made.

Art. 25 Refund

If the evidence required is provided on time, Lugano AP Authority shall refund the excess surcharge paid during the 60-day period.

Emission-related landing charges (WEF 01 APR 2010)**Art. 26 Principle**

An EM-related LDG surcharge is applied to all ACFT equipped with a combustion engine and that are subject to a WT-based LDG charge. The EM charge is based on the absolute EM characteristic of the engine, as described in the FOCA Directive "Aircraft Engine Emission Charges in Switzerland" (Reference 33-05-27).

Art. 27 Aircraft with turbofan, turbojet or turboprop engines with emission data available to FOCA

ACFT equipped with turbofan, turbojet or turboprop engines that are:

- regulated under the ICAO Annex 16, Volume II, or
- not regulated, but have detailed EM data for the LDG-TKOF (LTO) cycle AVBL to FOCA,

are subject to the EM calculation, as specified in ECAC Recommendation 27/4. Specifically, the following EM calculation formula applies:

$$\text{EmissionValueAircraft} = a^{*\#\text{Engines} *} \sum_{\text{LTO-modes}} (60 * \text{time} * \text{fuelflow} * \text{NOx}_{\text{Emissionfactor}} \div 1000)$$

where:

- a = 1 if the characteristic certification LTO Hydrocarbon emissions per rated thrust (HC Dp/Foo) is less than or equal to the current ICAO standard of 19.6 g/kN rated thrust or for unregulated engines.
- a > 1 if the characteristic certification LTO Hydrocarbon emissions per rated thrust (HC Dp/Foo) is greater than the current ICAO standard.
a = HC Dp/Foo /19.6, with a maximum value for 'a' of 4.0

LTO-Modes: ICAO Certification LTO Modes:

Mode	Time (in minutes)
Take-off	0.7
Climbout	2.2
Approach	4.0
Taxi/Idle	26.0

- # Engines: number of engines fitted to the aircraft
- Time: time in mode (see above) (in minutes)
- Fuelflow: fuel flow per mode (in kg/sec)
- NOx_{Emissionfactor} Measured NOx-Emission factor per mode (in g/kg fuel)

EM factors and fuel flow for the four modes and the hydrocarbon certification value are taken from the ICAO engine database (regulated engines). EM data for unregulated engines are taken from the FOCA and FOI EM database. The FOCA website provides additional information:

www.bazl.admin.ch -> For Specialists -> Environment

Art. 28 Aircraft with piston engines, helicopter and aircraft with engines without emission data available to FOCA

ACFT equipped with:

- piston engines
- rotary wing engines
- any other engine without EM data AVBL to FOCA

are also subject to an EM charge. Specifically, they are assigned an EM value derived from the type, PER and number of engines fitted to the ACFT, as detailed in Table1.

In the absence of client's instructions, in part or whole, Airport Altenrhein AG shall follow its own emergency response plans.

Airport Altenrhein AG shall take all reasonable measures to assist passengers, crew and family members and to safeguard and protect baggage, cargo and mail carried in the aircraft from loss or damage in cooperation with the relevant local authorities.

The client shall reimburse Airport Altenrhein AG for any extra expenses incurred in rendering such assistance.

In the absence of instructions from the client, Airport Altenrhein AG shall follow its own standard practices and procedures, which shall comply with the applicable Swiss rules, regulations and procedures.

3.2 Airport Altenrhein AG will carry out all other services in accordance with the client's procedures and instructions, or as mutually agreed. In the absence of instructions from the client, Airport Altenrhein AG shall follow its own standard practices and procedures.

If at any time Airport Altenrhein AG is unable to provide authorised personnel as requested by the client, Airport Altenrhein AG shall inform the Client immediately.

All claims or suits arising hereunder shall be dealt with by the client. Airport Altenrhein AG shall notify the client of any claims or suits without undue delay and shall furnish such assistance as the client may reasonably require.

10.2.1.4 Special cases

A lower charge may be applied for the FLT's mentioned below:

- technical check FLT's;
- training and check FLT's carried out under the surveillance of a FLT instructor or an inspector;
- Special agreements for home-based operators.

10.2.2 Noise-related landing charge

10.2.2.1 Charge duty

For the APCH and the subsequent LDG of each ACFT, a LDG charge is levied that is related to the noise class of the ACFT.

10.2.2.2 Aircraft up to 5700 kg MTOM

10.2.2.2.1 Noise class determination

FOCA is responsible for the ACFT classification and its update. The classification of ACFT registered in Switzerland is published in the Swiss register or in a separate list. The classification of ACFT registered abroad is established in conformity with the corresponding ACFT type classification REF: [GEN 4.1 - Appendix B](#) (Noise classification for propeller-driven ACFT without special sound-proofing).

10.2.2.2.2 Noise classification

The noise level limits in accordance with ICAO Annex 16 and the noise level measured and corrected for the ACFT PER factor or the corresponding ACFT type, are used to derive the noise classification for ACFT:

Noise class	Difference
A	Noise level HYR than the limit value;
B	0 to 1.9 dB, but less than the limit value;
C	2 to 4.9 dB, but less than the limit value;
D	5 dB and HYR, but less than the limit value.

10.2.2.2.3 Charge amount

The noise charge depends on the assignment of the ACFT to one of the classes A - D. It amounts to:

Noise class	Noise charge CHF (excl. VAT)
A	35.-- per tonne MTOM or fraction thereof;
B	20.-- per tonne MTOM or fraction thereof;
C	10.-- per tonne MTOM or fraction thereof;
D	no noise charge

10.2.2.2.4 New or noise-modified aircraft

The operator is allowed to propose a more advantageous classification for his ACFT within 60 days of the implementation of the charge being made. If the evidence necessary for a new classification is presented within the required time, the excess charges will be reimbursed.

10.2.2.3 Aircraft with jet engines

10.2.2.3.1 Noise class determination

Jet ACFT are classified according to the TKOF noise as measured by the ACFT noise-measuring equipment at Zurich AP. For the classification, the difference between the energetic mean value of the noise level of an ACFT type and the energetic mean value of the noise level measured for all ACFT types is used.

10.2.2.3.2 Noise classification

The assignment of each ACFT to the existing noise class is listed in [GEN 4.1 - Appendix A](#) (Noise classification for jet aircraft).

The charge amounts to:

Noise Class	Charge per ton in CHF (excl. VAT)
A	7.--
B	4.--
C	2.--
D	0.--

A fraction of a tonne is considered as a full tonne.

11.3.4 Emission-related landing charges

Principle

An EM-related LDG surcharge is applied to all ACFT equipped with a combustion engine and that are subject to a WT-based LDG charge. The EM charge is based on the absolute EM characteristic of the engine, as described in the FOCA Directive "Aircraft Engine Emission Charges in Switzerland" (Reference 33-05-27).

Aircraft with turbofan, turbojet or turboprop engines with emission data available to FOCA

ACFT equipped with turbofan, turbojet or turboprop engines that are:

- regulated under ICAO Annex 16, Volume II, or
- not regulated, but have detailed EM data for the LDG-TKOF (LTO) cycle AVBL to FOCA,

are subject to the EM calculation as specified in ECAC Recommendation 27/4. Specifically, the following EM calculation formula applies:

$$\text{EmissionValueAircraft} = a * \# \text{Engines} * \sum_{\text{LTO-modes}} (60 * \text{time} * \text{fuelflow} * \text{NOx}_{\text{Emissionfactor}} \div 1000)$$

Where:

- A = 1 if the characteristic certification LTO Hydrocarbon emissions per rated thrust (HC Dp/Foo) is less than or equal to the current ICAO standard of 19.6 g/kN rated thrust or for unregulated engines
- A > 1 if the characteristic certification LTO Hydrocarbon emissions per rated thrust (HC Dp/Foo) is less than or equal to the current ICAO standard of 19.6 g/kN rated thrust or for unregulated engines.

LTO-Modes	ICAO Certification LTO Modes	
	Mode	Time (in minutes)
	Take-off	0.7
	Climbout	2.2
	Approach	4.0
	Taxi/idle	26.0

- # Engines: number of engines fitted to the aircraft
- Time Time in mode (see above) (in minutes)
- Fuelflow: Fuel flow per mode (in kg/sec)
- NOx_{Emissionfactor} Measured NOx-Emission factor per mode (in g/kg fuel)

EM factors and fuel flow for the four modes and the hydrocarbon certification value are taken from the ICAO engine database (regulated engines). EM data for unregulated engines are taken from the FOCA and FOI EM database. The FOCA website provides additional information: www.bazl.admin.ch -> For Specialists -> Environment

Aircraft with piston engines, helicopter and aircraft with engines without emission data available to FOCA

ACFT equipped with:

- piston engines
- rotary wing engines
- any other engine without EM data AVBL to FOCA

are also subject to an EM charge. Specifically, they are assigned an EM value derived the type, PER and number of engines fitted to the ACFT, as detailed in Table 1.

Table 1: FOCA Aircraft Emission Value Matrix

# Eng	Piston: Turbodiesel Microlight Ecolight	Piston: Conventional	Piston: Conventional	Piston: Conventional	Helicopter	Helicopter	Business-Jets	Business-Jets	Turbo-props

11.4.3 Charge amount

The amounts in force are listed in [GEN 4.2 AIR NAVIGATION SERVICES CHARGES](#).

For each passenger departing on an ACFT a boarding charge is levied whereby [11.5.2](#) is reserved.

II. General

Art. 1 General provisions

Based on Art. 39 of the Federal Act on Civil Aviation (CAA, SR 748.0) and the Ordinance on Airport Charges (OAC, SR 748.131.3), FZAG is issuing the following airport charges regulation.

Any objections to invoices for charges from FZAG must be submitted to FZAG, Accounts Receivable Department, P.O Box, 8058 Zurich Airport within 10 days of the invoice being issued. FZAG will decide on disputed invoices for charges by means of a ruling. Any complaints regarding rulings made by FZAG must be addressed to the Federal Administrative Court within 30 days of opening.

The place of performance is Zurich Airport.

The exclusive place of jurisdiction for civil disputes arising from this charges regulation is Bülach. Swiss law applies.

Art. 2 Precedence over AIP publication

The airport charges regulation in their current valid version in German takes precedence over the AIP and the English translation.

Art. 3 Liability

Within the scope of these charging regulations, FZAG's liability is based on the Federal Act on the Liability of the Federal Government (SR 170.32) as well as Art. 4 of the Zurich Airport Operating Regulations dated June 30, 2011.

This airport charges regulation does not constitute a performance guarantee by FZAG. As such, any liability of FZAG is excluded to the extent permitted by law, including liability for consequential damage and loss of earnings, damages as a result of delays and additional costs in the handling process, and as a result of data loss. FZAG is not liable for its own negligence, nor that of its employees and auxiliaries.

Art. 4 Offsetting

Debtors may not offset claims they might have against FZAG against airport charges.

Art. 5 Collection of Airport Charges

FZAG may commission third parties with the collection of airport charges. These charges are set in accordance with the principles established in the ordinance on airport charges and published in AIP.

III. Flight operations charges

Art. 6 Debtor

Unless stated otherwise, the concession holder is the debtor for flight operations charges for flights operated under a route concession.

If the concession holder cannot be prosecuted or if the flight is not operated under a route concession, the operator of the arriving or departing aircraft is liable in lieu. If the operator cannot be prosecuted either, then the owner of the arriving or departing aircraft takes his place.

The operator is the natural person or legal entity that operates the flight at its own cost and has power of control over the aircraft. If one aircraft has several operators, they are jointly liable for flight operations charges. If the operator of an aircraft is not the same as the owner, the operator and owner are jointly liable for flight operations charges.

Art. 7 Exemptions

The following users are exempt from flight operations charges:

- The Swiss Confederation for official flights of the Federal Office of Civil Aviation (FOCA) and the aircraft accident investigation bureau while fulfilling official duties;
- Swiss state flights,
- Foreign state flights, provided they are transporting a head of state on an official state visit, and
- Search and rescue flights that have been mandated by the Swiss control centre for search and rescue services for civil aviation.

Art. 8 Rates

The rates for flight operations charges are shown in Swiss francs (CHF), excluding value added tax (VAT).

Art. 9 Invoicing and payment

Airport charges are invoiced in CHF.

The flight operations charges are due after FZAG has provided the respective service and prior to departure of the aircraft from Zurich Airport. FZAG may allow postponed payments for parties liable that use Zurich Airport regularly and

- whose headquarters or subsidiary branch is based in Switzerland or
- who have established a special domicile within the meaning of Art. 50, para. 2 of the Federal Act on Debt Enforcement and Bankruptcy (SR 281.1) in Switzerland for the receivables of FZAG arising from this airport charges regulation,

If postponed payment has been granted and unless otherwise agreed, payment is to be made within 10 days of the invoice being issued. In the event of a postponed payment, the debtor must provide FZAG with (direct or indirect) guarantees from a bank headquartered in Switzerland, a payment deposit or similar assurances for an invoice volume of at least one month. In exceptional cases, FZAG may waive the requirement of a guarantee.

If payments are overdue, FZAG reserves the right to

- charge default interest at the rate of 5%,
- refuse departure and charge the debtor for the resulting costs including compensation.

Art. 10 Documentation requirements

The debtor of the flight operations charges must submit the following documentation for the aircraft that they are responsible for operating to and from Zurich annually by 1 April.

- aircraft registration

The documentation must be accompanied by the corresponding pages from the AFM.

Furthermore, users are obliged to notify FZAG immediately in the event of any changes to the data during a year. Any retroactive complaints regarding MTOM will not be considered.

The documentation is also used to calculate the approach charges, which FZAG collects on behalf of Skyguide Ltd.

Data for billing and statistics (load messages and passenger transfer messages, inbound connection lists) are generally transmitted by the handling agents to FZAG. Airlines are obliged to make such data available. The timely submission of correct data is necessary for accurate invoicing.

Art. 11 Entry into force and duration

The changes to the flight operations charges in accordance with the agreement dated 15 July 2020 will be implemented as of 1 April 2021. Moreover, the flight operations charges in accordance with the charging regulations dated 1 September 2016 (as at 1 July 2020) remain unchanged.

FZAG will initiate next proceedings for adjusting flight operations charges in accordance with Art. 20 et seq. OAC with the information about the proceedings in accordance with Art. 20a OAC at a point in time at which, based on the last available Annual Report of FZAG, the cumulative result (economic value added, EVA) plus the result of the last financial year supplemented by the change in result from the year before last to last year in the regulated segments (Art. 19 para. 1 lit. a to e OAC) since 1 July 2016 is equal or positive for the first time, but at the earliest once the financial statements for 2020 become available, and at the latest by 1 April 2025.

Incentive payment for jet aircraft:

Upon application, FZAG provides incentive payments for low-noise jet aircraft that are used at Zurich Airport and meet the following requirements:

- The respective aircraft type has been certified by the European Aviation Safety Agency (EASA) for a maximum of four years before its application and it has been operated newly at Zurich airport between certification and application;
- The noise reduction based on the noise measured by Zurich Airport compared to the aircraft type previously used for the same operation must be at least 5 dB. The noise reduction is measured at the same noise measuring points that are also used to measure jet aircraft noise.

The incentive payment is granted as of regular operation of the eligible aircraft type by the airline concerned at Zurich Airport, and based on its effective annual landings for three years but in any case only until the end of the validity period of this airport charges regulation.

The sum of CHF 1 million is available each calendar year for the incentive payments. The amount is credited to the eligible airline at the beginning of the following calendar year based on its share of eligible landings in all eligible landings in the corresponding calendar year. The yearly incentive amount per airline is limited to the total amount of the aircraft noise charges (excluding noise surcharges for shoulder and night hours) paid by the respective airline during this year. The maximum payment per landing is CHF 100.00.

Applications must be submitted to Flughafen Zürich AG, Noise Management, P.O. Box, 8058 Zurich Airport, using the application form found at www.zurich-airport.com/charges by 31 January of the following year.

Relief mechanism for jet aircraft

FZAG relieves airlines that are relevant for the hub-operation at Zurich airport upon application, if the following conditions are met:

- the Airline operates passenger flights (CATY10) during shoulder and night hours at Zurich Airport. Scheduled and actual time of departure have to be between 20:00:01 (19:00:01) and 06:00:00 (05:00:00).
- The non-stop flight distance of the flight in question must be at least 5'000 km
- the average seat load factor (SLF) of the Airline during shoulder and night hours is higher than the average SLF of all airlines at Zurich Airport during these times

If an Airline meets all of the above mentioned criteria, the additional charges due to the increase of charges during shoulder and night hours will be refunded.

The refund will only apply to flights with scheduled and actual time of departure (respectively arrival) between 20:00:01 (19:00:01) and 22:00:00 (21:00:00) or 05:00:01 (04:00:01) and 06:00:00 (05:00:00).

The amount of refund is defined as the difference between the actual noise charges paid during shoulder and night-time hours and the hypothetical noise charges during shoulder and night-time hours that would have been paid if the noise charge framework applicable on 31 December 2014 had been applied to the flight movements of the airline concerned during the year in question.

Aircraft noise surcharge for shoulder and night hours per take off (as per 31. December 2014):

Propeller aircraft

The following noise charges per noise class ([GEN 4.1 - Appendix B](#)) are valid for propeller driven aircraft with a MTOM of up to 8.7t:

Daytime noise charge

Noise class	Charge per landing per t MTOM
A	7.00
B	4.00
C	2.00
D	0.00

Propeller driven aircraft with an MTOM of more than 8.7 tonnes are classified in noise class V for jet aircraft.

The MTOM according to the AFM is applicable and rounded up to the next tonne.

During shoulder and night hours, for all propeller driven aircraft, independently from their MTOM, the surcharges of noise class V for jet aircraft apply.

Emission charge**Jet aircraft**

For aircraft that are regulated by ICAO Annex 16, Vol. II, and aircraft that are not regulated but for which the FOCA does hold emissions data, the emission charge per landing is determined and collected on the basis of Guideline 33-05-27 of the FOCA regarding "Aircraft Engine Emission Charges in Switzerland" dated 1 June 2009. The following formula applies:

Emission Charge = EmissionValueAircraft * Emission tariff whereas
Emission tariff = 2.50 CHF

$$\text{EmissionValueAircraft} = a * \# \text{Engines} * \sum_{LTO - \text{modes}} (60 * \text{time} * \text{fuelflow} * \text{NOx}_{\text{Emissionfactor}} \div 1000)$$

whereas:

- a = 1 if the certified LTO Hydrocarbon emission per rated axial thrust (HCC Dp/Foo) is less than or equal to the current ICAO standard for non-regulated engines.
- a > 1 if the certified LTO Hydrocarbon emission per rated thrust (HCC Dp/Foo) is greater than the current ICAO standard for non-regulated engines. a = HC Dp/Foo/19.6, with a maximal value of a = 4.0

For LTO hydrocarbon emissions, the following certification values from the ICAO resp. FOCA engine emission database apply:

Mode	Time (in minutes)	
Take-off	0.7	
Climbout	2.2	
Approach	4.0	
Taxi/Idle	26.0	
Fuelflow:	fuel flow per mode	(in kg/sec)
NOx _{Emissionfactor}	Measured NOx-Emission factor per mode	(in g/kg fuel)

Other aircraft

Propeller driven aircraft, helicopters and aircraft for which the Federal Office of Civil Aviation does not hold engine data, are also subject to the emission charges as follows:

Table 1: FOCA Aircraft emission Value Matrix

Aircraft parking charge

Scheduled / Charter (S/C):

Aircraft parking charges for S/C are graded based on the MTOM classification for levying landing charges and are levied per minute, divided into high rate and low rate tariffs. The aircraft parking charges are calculated according to the actual time of arrival (ATA) and actual time of departure (ATD).

- For MTOM classes 1 – 6, the first 30 minutes are free of charge; from the 31st minute up to and including the 180th minute, the high rate tariff applies, then the low rate tariff.
- For MTOM classes 7 and 8, the first 60 minutes are free of charge; from the 61st minute up to and including the 240th minute, the high rate tariff applies, then the low rate tariff.
- For MTOM class 9, the first 90 minutes are free of charge; from the 91st minute up to and including the 300th minute, the high rate tariff applies, then the low rate tariff.

Aircraft parking charges are not levied between 22:00:01 and 05:00:00 (21:00:01 and 04:00:00). During this time, the calculation of parking time is suspended. If a parking procedure at the high rate tariff is interrupted by the fee-free parking period, the high rate tariff will continue once the fee-free parking period has expired. If a parking procedure at the low rate tariff is interrupted, the low rate tariff will continue once the fee-free parking period has expired. If a parking procedure is interrupted during the initial fee-free period, the fee-free period will continue to apply afterwards.

If the parking time is interrupted by a move to a non-chargeable stand, the parking time begins again as soon as the aircraft is moved back to a chargeable stand.

MTOM class	High tariff per hour	Low tariff per hour
1 - 3	29.00	7.00
4	48.30	11.60
5	87.00	20.80
6	145.00	34.70
7	241.70	57.80
8	338.30	80.90
9	435.00	104.00

GA/BA aircraft parking charges are charged in the same way as for S/C. Regardless of the MTOM class, the first 120 minutes are free of charge.

Aircraft parking charges are not levied between 22:00:01 and 05:00:00 (21:00:01 and 04:00:00). During this time, the calculation of parking time is suspended.

If the parking time is interrupted by a move to a non-chargeable stand, the parking time begins again as soon as the aircraft is moved back to a chargeable stand.

The aircraft parking charge for GA/BA is increased by 200% two days before (from 05:00:01 (04:00:01)) until two days after the World Economic Forum (until 22:00:00 (21:00:00)).

As of 1 January 2024, GA/BA aircraft parking charges will be charged in the same way as for S/C. Regardless of the MTOM class, GA/BA will have a fee-free period of 120 minutes as of 1 January 2024.

Passenger related charges**General provisions:**

Passenger related charges are levied per departing passenger. The following are exempt from the passenger-related charges:

- children under the age of two years,
- Crew members in an operational function during the flight in question (incl. emergency flights), including operational flights, training, measurement or test flights,
- crew members who do not have a flight ticket and who are transported to another airport for the purpose of service on a flight from that airport (dead head crew) and
- transit passengers

Passenger charge

Charge per departing passenger:

Local passenger	21.00
Transfer passenger	8.00
GA/BA passenger	4.30

Discount on passenger charge:

Flughafen Zürich AG grants a discount between 1% and 10% on passenger charges to S/C airlines based on the number of departing passengers (total of local and transfer passengers) per calendar year. The number of departing (invoiced) passengers of the respective airline during the respective calendar year is decisive.

The discount is 10%* $\frac{\text{departing passengers per year}}{1'000'000}$

Airlines with a passenger volume of less than 100'000 departing passengers per year and airlines that have not paid one or more airport charge invoices on time in the calendar year in question are not entitled to a discount. The discount is capped at 10% for Airlines with 1'000'000 or more departing passengers per year.

The discount is credited within three months of the end of the calendar year in question.

The holder of an aircraft and the forwarding agent are jointly liable for freight-related charges. A forwarding agent is defined as any recipient in accordance with the transport order and, for airmail, Swiss Post Ltd. or the designated postal organisation of a member state in accordance with the UPU.

Transfer freight charges are invoiced to the incoming carrier.

The freight-related charge applies to freight that is transported by aircraft, as well as freight that is transported via Road Feeder Service (RFS).

The freight charge is levied per kg (gross weight, off loaded), according the airway bill (AWB).

Airmail is considered freight within the scope of this section, but is charged based on the export volume.

Art. 24 Approach charges

Flughafen Zürich AG is commissioned by Skyguide Ltd. to invoice the approach charges.

The approach charges are published in the AIP Switzerland, GEN 4.2.

Art. 1 to 10 apply analogously.

Specifically, airlines are required to provide proper documentation in accordance with Art. 10

In case no data is received by Flughafen Zürich AG, no reminder will be sent to the airline / aircraft operator and the highest MTOM known of the corresponding aircraft type at Zurich Airport is applied.

In case wrong documentation is received by Flughafen Zürich AG, one request will be sent to the airline / aircraft operator to provide the correct data. Until the reception of correct data, the highest MTOM known of the corresponding aircraft type at Zurich Airport is applied.

In case an airline / aircraft operator provides the MTOM data after the deadline, the highest MTOM known of the corresponding aircraft type at Zurich Airport will be applied until the correct MTOM has been provided by the airline / aircraft operator.

Airlines / aircraft operators shall report changes during the year to FZAG and provide documentation in accordance. If reported at least five working days in advance, such changes come into effect on the first day of the following month. Otherwise the changes come into effect on the first day of the subsequent month.

In all cases, MTOM will not be adjusted retrospectively and no credit notes will be granted for a time period for that FZAG has received the correct MTOM data.

Art. 25 Slot service fee

FZAG is commissioned by Slot Coordination Switzerland to invoice the slot service fee. The fee due by the air carrier amounts to 1.00 CHF per movement.

LSZH A1 Overview of MTOM classification

New aircraft that land at Zurich Airport and that are not yet classified, will be classified based on their MTOM given in the Aircraft Manual until a reasonable MTOM average of all operations at Zurich Airport is available for a definitive classification.

MTOM class	Weight
1	> 0 t and ≤ 2 t
2	> 2 t and ≤ 5 t
3	> 5 t and ≤ 15 t
4	> 15 t and ≤ 25 t
5	> 25 t and ≤ 50 t
6	> 50 t and ≤ 100 t
7	> 100 t and ≤ 200 t
8	> 200 t and ≤ 400 t
9	> 400 t

14.1 Noise classification for propeller-driven aircraft

Classification rules

Propeller planes are divided into noise classes in accordance with their noise level (measured noise level, corrected for the performance factor of the aircraft or aircraft type) compared to the limit in accordance with ICAO Annex 16:
